

A complex network graph visualization. It features a central hub-and-spoke structure with many peripheral nodes. The majority of the nodes and edges are light gray. A few nodes and edges are highlighted in dark green, and one edge is highlighted in orange. The overall shape is roughly circular, with the central hub at the origin.

102.00
159.00
228.00

A phylogenetic tree showing the relationships between OTUs. The tree is rooted at the top and branches downwards. The nodes are colored according to the OTU count, with a color scale ranging from 1.00 (lightest) to 228.00 (darkest). The tree is labeled 'Nodes' and 'OTU count'.
